**Announces  
 National Symposium  
 On**

**Dentofacial  
 Orthopedics:  
 Scrutinizing the  
 Concepts**

5<sup>th</sup> & 6<sup>th</sup> August 2016

Host:

Dept. Of Pedodontics & Preventive Dentistry  
 Modern Dental College & Research Centre  
 (MDCRC), Indore

The crux of the symposium is to scrutinize 'functional mandibular shifts', which is a part of functional examination in orthodontic diagnosis but often missed. The importance, subjective and objective ways for diagnosis of functional occlusion will be emphasized from the deliberations of national stalwarts. The platform will also provide us an opportunity to discuss problems in early diagnosis and treatment during mixed dentition. The symposium & workshop is focused on pediatric dentists interested in learning the early management skills for dento-skeletal problems in children and adolescents. This philosophy with over years of clinical experience is based on the use of correct diagnostic tools applied to the growing child to correct malocclusions. The array of speakers and workshop by Dr. Marc Saadia will enable participants to know whether to treat or wait based on scientific knowledge and experience to achieve excellence.
